## Life expectancy and Health Expenditure

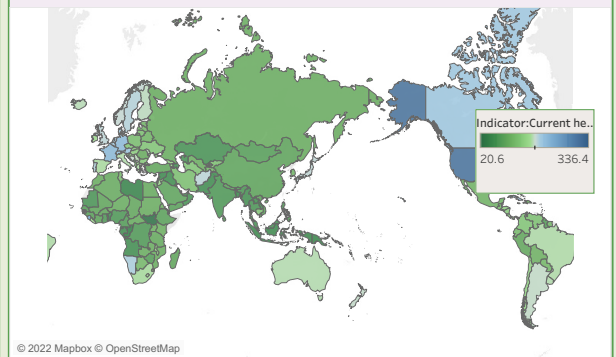

Health is one of the most important indicators of human development and spending upon it makes a man physically and mentally fit. **Health expenditure** is the amount of money spent by citizens and public sector out of total income.

Total **health expenditure** is the sum of public and private **health expenditure**. It covers the provision of **health services** (preventive and curative), family planning activities, nutrition activities, and emergency aid designated for **health** but does not include provision of water and sanitation
